beta Catenin (CTNNB1) Rabbit Polyclonal Antibody

Product data:

Product Type: Primary Antibodies

Applications: WB

Recommended Dilution: IHC: 1:50-1:200

Reactivity: Human, Mouse, Rat **Modifications:** Phospho-specific

Host: Rabbit

Isotype: IgG

Clonality: Polyclonal

Immunogen: The antiserum was produced against A synthesized peptide derived from human Catenin-

beta around the phosphorylation site of Serine 33

Formulation: Rabbit IgG in phosphate buffered saline, pH 7.4, 150mM NaCl, 0.02% sodium azide and 50%

glycerol.

Concentration: lot specific

Purification: The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using

epitope-specific peptide.

Conjugation: Unconjugated

Storage: Store at -20°C as received.

Stability: Stable for 12 months from date of receipt.

Predicted Protein Size: kDa

Gene Name: catenin beta 1

Database Link: NP 001091679

Entrez Gene 12387 MouseEntrez Gene 84353 RatEntrez Gene 1499 Human

P35222

Background: Beta-catenin is an adherens junction protein. Adherens junctions (AJs; also called the zonula

adherens) are critical for the establishment and maintenance of epithelial layers, such as those lining organ surfaces. AJs mediate adhesion between cells, communicate a signal that neighboring cells are present, and anchor the actin cytoskeleton. In serving these roles, AJs

regulate normal cell growth and behavior.

Synonyms: armadillo; CTNNB; MRD19

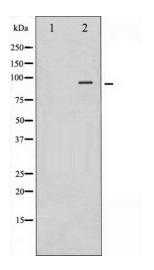

Protein Families: Druggable Genome, ES Cell Differentiation/IPS, Transcription Factors

Protein Pathways: Adherens junction, Arrhythmogenic right ventricular cardiomyopathy (ARVC), Basal cell

carcinoma, Colorectal cancer, Endometrial cancer, Focal adhesion, Leukocyte transendothelial migration, Melanogenesis, Pathogenic Escherichia coli infection, Pathways in cancer, Prostate

cancer, Thyroid cancer, Tight junction, Wnt signaling pathway
