

## Product datasheet for **TA326398**

### Amigo1 Mouse Monoclonal Antibody [Clone ID: S86-36]

#### Product data:

Product Type:	Primary Antibodies
Clone Name:	S86-36
Recommended Dilution:	WB: 1:1000
Reactivity:	Mouse, Human, Rat
Host:	Mouse
Isotype:	IgG1
Clonality:	Monoclonal
Immunogen:	Fusion protein amino acids 395-493 (cytoplasmic C-terminus) of mouse AMIGO-1.
Formulation:	PBS pH7.4, 50% glycerol, 0.09% sodium azide
Concentration:	lot specific
Purification:	Protein G Purified
Conjugation:	Unconjugated
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Gene Name:	adhesion molecule with Ig like domain 1
Database Link:	<a href="#">Entrez Gene 229715 Mouse Q80ZD8</a>
Background:	The amphoterin-induced gene and ORF (AMIGO) family of proteins consists of AMIGO1, AMIGO2 and AMIGO3. All three members are single pass type I membrane proteins that contain several leucine-rich repeats, one IgG domain and a transmembrane domain. The AMIGO proteins are specifically expressed on fiber tracts of neuronal tissues and participate in their formation. They can form complexes with each other, but can also self-bind. AMIGO1, also designated Alivin2, promotes growth and fasciculation of neurites and plays a role in myelination and fasciculation of developing neural axons. In cerebellar neurons, AMIGO2 (Alivin1) is crucial for depolarization-dependent survival. Similar to AMIGO1 and AMIGO2, AMIGO3 (Alivin3) plays a role in hemophilic and/or heterophilic cell-cell interaction and signal transduction.
Synonyms:	ALI2; AMIGO; AMIGO-1
