

# Product datasheet for TA327155

## Annexin V (ANXA5) Rabbit Polyclonal Antibody

## **Product data:**

#### **Product Type: Primary Antibodies Applications:** ELISA, ICC/IF, WB Recommended Dilution: WB.1:500 - 1:2000 IF/ICC,1:50 - 1:200 ELISA, Recommended starting concentration is 1 µg/mL. Please optimize the concentration based on your specific assay requirements. **Reactivity:** Human, Mouse Host: Rabbit Isotype: lgG **Clonality:** Polyclonal Formulation: Buffer: PBS with 0.02% sodium azide,50% glycerol,pH7.3. Concentration: lot specific **Purification:** Affinity purification **Conjugation:** Unconjugated Store at -20°C. Avoid freeze / thaw cycles. Storage: Stable for 12 months from date of receipt. Stability: Predicted Protein Size: 36kDa Gene Name: annexin A5 Database Link: NP 001145 Entrez Gene 11747 MouseEntrez Gene 308 Human P08758

### **GRIGENE** Annexin V (ANXA5) Rabbit Polyclonal Antibody – TA327155

Background:The Annexin 5 gene spans 29 kb containing 13 exons, and encodes a single transcript of<br/>approximately 1.6 kb and a protein product with a molecular weight of about 35 kDa.The<br/>protein encoded by this gene belongs to the annexin family of calcium-dependent<br/>phospholipid binding proteins some of which have been implicated in membrane-related<br/>events along exocytotic and endocytotic pathways. Annexin 5 is a phospholipase A2 and<br/>protein kinase C inhibitory protein with calcium channel activity and a potential role in<br/>cellular signal transduction, inflammation, growth and differentiation. Annexin 5 has also<br/>been described as placental anticoagulant protein I, vascular anticoagulant-alpha, endonexin<br/>II, lipocortin V, placental protein 4 and anchorin CII. Polymorphisms in this gene have been<br/>implicated in various obstetric complications.

Synonyms: ANX5; ENX2; HEL-S-7; PP4; RPRGL3
