## Synaptophysin (SYP) Rabbit Polyclonal Antibody

#### **Product data:**

**Product Type:** Primary Antibodies

Applications: IHC

Recommended Dilution: IHC: 1:100 - 1:500

Reactivity: Human

Host: Rabbit

Clonality: Polyclonal

**Formulation:** This antibody is supplied as cell culture supernatant diluted in tris buffered saline, pH 7.3-7.7,

with 1% BSA and <0.1% sodium azide.

Conjugation: Unconjugated

**Storage:** Store at -20°C as received.

**Stability:** Stable for 12 months from date of receipt.

**Gene Name:** synaptophysin

Database Link: NP 003170

Entrez Gene 6855 Human

P08247

Synonyms: MRX96; MRXSYP

**Note:** Anti-synaptophysin reacts with neuroendocrine cells of human adrenal medulla, carotid

body, skin, pituitary, thyroid, lung, pancreas, and gastrointestinal mucosa. Positive staining is seen in neurons of the brain, spinal cord, retina, Paneth cells in the gastrointestinal tract, and

gastric parietal cells. This antibody identifies normal neuroendocrine cells and

neuroendocrine neoplasms. Diffuse, finely granular cytoplasmic staining is observed, which probably correlates with the distribution of the antigen within neurosecretory vesicles. The expression of synaptophysin is independent of the presence of NSE or other neuroendocrine

markers. Anti-synaptophysin is an independent, broad-range marker of neural and

neuroendocrine differentiation.

**Protein Families:** Secreted Protein, Transmembrane
