

Product datasheet for TA328967

Kcnj8 Rabbit Polyclonal Antibody

Product data:

OriGene Technologies, Inc.

9620 Medical Center Drive, Ste 200 Rockville, MD 20850, US Phone: +1-888-267-4436 https://www.origene.com techsupport@origene.com EU: info-de@origene.com CN: techsupport@origene.cn

| Product Type: | Primary Antibodies |
|-------------------------------|--|
| Applications: | IHC, WB |
| Recommended Dilution: | WB: 1:200-1:2000; IHC: 1:100-1:3000 |
| Reactivity: | Rat |
| Host: | Rabbit |
| Clonality: | Polyclonal |
| Immunogen: | Peptide (C)KRNSMRRNNSMRRSN, corresponding to amino acid residues 382-396 of rat Kir6.1. Intracellular, C-terminal part. |
| Formulation: | Lyophilized. Concentration before lyophilization ~0.8mg/ml (lot dependent, please refer to CoA along with shipment for actual concentration). Buffer before lyophilization: Phosphate buffered saline (PBS) pH 7.4, 1% BSA, 0.025% NaN3. |
| Reconstitution Method: | Add 50 ul double distilled water (DDW) to the lyophilized powder. |
| Purification: | Affinity purified on immobilized antigen. |
| Conjugation: | Unconjugated |
| Storage: | Store at -20°C as received. |
| Stability: | Stable for 12 months from date of receipt. |
| Gene Name: | potassium voltage-gated channel subfamily J member 8 |
| Database Link: | <u>NP_058795</u> <u>Entrez Gene 25472 Rat</u> <u>Q63664</u> |

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2025 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

GRIGENE Kcnj8 Rabbit Polyclonal Antibody – TA328967

Background:Kir 6.1 is a member of the inward rectifier K+ channels (Kir channels), a large family of
voltage-independent K+ channels largely involved in stabilization of the membrane resting
potential and in K+ transport across membranes. Kir 6.1 like its close relative Kir 6.2 is highly
sensitive to inhibition by intracellular ATP. Closure of the channel leads to membrane
depolarization hence coupling intracellular metabolism to cellular excitability. Kir 6.1 presents
the common topology of the inward-rectifier superfamily: two transmembrane domains
flanking a highly conserved pore region with the N and C-terminus located intracellularly. The
functional ATP sensitive channel (KATP) is composed of octamers of four Kir 6.x subunits and
four members of the sulfonylurea receptor family SUR1, SUR2A and SUR2B. Kir 6.1 tissue
distribution is relatively broad with expression detected in heart, brain, and smooth muscle.
We are pleased to introduce an antibody against a highly specific region in the C-terminal
intracellular domain of the rat Kir 6.1 subunit. Anti-Kir 6.1 antibody (#APC-105) should also
recognize Kir 6.1 from human, mouse, pig and rabbit origin.

Synonyms: KIR6.1; uKATP-1

Western blot analysis of rat heart membranes: 1. Anti-Kir6.1 antibody, (1:200). 2. Anti-Kir6.1 antibody, preincubated with the control peptide antigen.

Western blot analysis of rat cortex lysate: 1. Anti-Kir6.1 antibody, (1:200). 2. Anti-Kir6.1 antibody, preincubated with the control peptide antigen.

Expression of Kir6.1 in rat uterus. Immunohistochemical stain of pregnant rat longitudinal section of the myometrium using Anti-Kir6.1 antibody, (1:50). Strong and specific staining is evident in smooth muscles cells both in the myometrium (blue arrow) and muscular layers of blood vessels (green arrow). Peroxidase reaction with DAB were used for the color reaction. Hematoxilin is used as the counterstain.
