

## **Product datasheet for TA329276**

## **TAF10 Rabbit Polyclonal Antibody**

## **Product data:**

**Product Type: Primary Antibodies** 

WB

**Applications:** 

Recommended Dilution:

Reactivity:

Human, Mouse

Rabbit Host: Isotype: lgG

Polyclonal Clonality:

Immunogen: The immunogen for anti-TAF10 antibody: synthetic peptide directed towards the middle

region of human TAF10. Synthetic peptide located within the following region:

GFEASDPRIIRLISLAAQKFISDIANDALQHCKMKGTASGSSRSKSKDRK

Formulation: Liquid. Purified antibody supplied in 1x PBS buffer with 0.09% (w/v) sodium azide and 2%

sucrose.

Note that this product is shipped as lyophilized powder to China customers.

Conjugation: Unconjugated

Store at -20°C as received. Storage:

Stability: Stable for 12 months from date of receipt.

**Predicted Protein Size:** 22 kDa

TATA-box binding protein associated factor 10 Gene Name:

Background:

Initiation of transcription by RNA polymerase II requires the activities of more than 70 polypeptides. The protein that coordinates these activities is transcription factor IID (TFIID), which binds to the core promoter to position the polymerase properly, serves as the scaffold for assembly of the remainder of the transcription complex, and acts as a channel for regulatory signals. TFIID is composed of the TATA-binding protein (TBP) and a group of evolutionarily conserved proteins known as TBP-associated factors or TAFs. TAFs may participate in basal transcription, serve as coactivators, function in promoter recognition or modify general transcription factors (GTFs) to facilitate complex assembly and transcription initiation. This gene encodes one of the small subunits of TFIID that is associated with a subset of TFIID complexes. Studies with human and mammalian cells have shown that this subunit is required for transcriptional activation by the estrogen receptor, for progression through the cell cycle, and may also be required for certain cellular differentiation programs. [provided by RefSeq, Jul 2008]

Synonyms: TAF2A; TAF2H; TAFII30

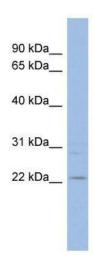

Note: Immunogen sequence homology: Dog: 100%; Pig: 100%; Rat: 100%; Horse: 100%; Human:

100%; Mouse: 100%; Bovine: 100%; Rabbit: 100%; Guinea pig: 100%; Zebrafish: 86%

**Protein Families:** Druggable Genome, Transcription Factors

**Protein Pathways:** Basal transcription factors
