# Product datasheet for TA332559

## SLP76 (LCP2) Rabbit Polyclonal Antibody

## **Product data:**

Product Type:	Primary Antibodies
Applications:	WB
Recommended Dilution:	WB 1:500 - 1:2000
Reactivity:	Human, Mouse
Host:	Rabbit
lsotype:	IgG
Clonality:	Polyclonal
Immunogen:	Recombinant protein of human LCP2
Formulation:	Store at -20°C (regular) and -80°C (long term). Avoid freeze / thaw cycles. Buffer: PBS with 0.02% sodium azide, 50% glycerol, pH7.3.
Concentration:	lot specific
Purification:	Affinity purification
Conjugation:	Unconjugated
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Predicted Protein Size:	533
Gene Name:	lymphocyte cytosolic protein 2
Database Link:	<u>NP_005556</u> <u>Entrez Gene 16822 MouseEntrez Gene 3937 Human</u> <u>Q13094</u>

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2023 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

#### **GRIGENE** SLP76 (LCP2) Rabbit Polyclonal Antibody – TA332559

Background:SLP-76 was originally identified as a substrate of the ZAP-70 protein tyrosine kinase following<br/>T cell receptor (TCR) ligation in the leukemic T cell line Jurkat. The SLP-76 locus has been<br/>localized to human chromosome 5q33 and the gene structure has been partially<br/>characterized in mice. The human and murine cDNAs both encode 533 amino acid proteins<br/>that are 72% identical and comprised of three modular domains. The NH2-terminus contains<br/>an acidic region that includes a PEST domain and several tyrosine residues which are<br/>phosphorylated following TCR ligation. SLP-76 also contains a central proline-rich domain and<br/>a COOH-terminal SH2 domain. A number of additional proteins have been identified that<br/>associate with SLP-76 both constitutively and inducibly following receptor ligation, supporting<br/>the notion that SLP-76 functions as an adaptor or scaffold protein. Studies using SLP-76<br/>deficient T cell lines or mice have provided strong evidence that SLP-76 plays a positive role in<br/>promoting T cell development and activation as well as mast cell and platelet function.

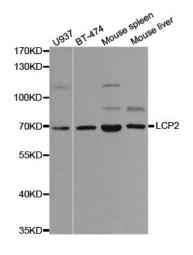

SLP-76; SLP76

**Protein Pathways:** 

Synonyms:

Fc epsilon RI signaling pathway, Natural killer cell mediated cytotoxicity, T cell receptor signaling pathway
