Product Type:	Primary Antibodies
Applications:	ICC/IF, IHC, WB
Recommended Dilution:	WB 1:500 - 1:2000;IF 1:50- 1:200
Reactivity:	Human, Mouse, Rat
Host:	Rabbit
lsotype:	IgG
Clonality:	Polyclonal
Immunogen:	Recombinant protein of human CBFB
Formulation:	Store at -20°C (regular) and -80°C (long term). Avoid freeze / thaw cycles. Buffer: PBS with 0.02% sodium azide, 50% glycerol, pH7.3.
Concentration:	lot specific
Purification:	Affinity purification
Conjugation:	Unconjugated
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Predicted Protein Size:	182
Gene Name:	core-binding factor, beta subunit
Database Link:	<u>NP_001746</u> <u>Entrez Gene 12400 MouseEntrez Gene 361391 RatEntrez Gene 865 Human</u> <u>Q13951</u>

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2025 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

#### **CBFB** Rabbit Polyclonal Antibody – TA332598S

PEBP2B

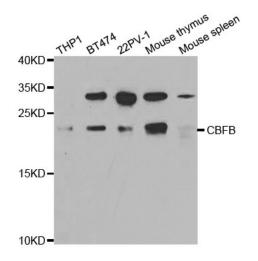

Background:The protein encoded by this gene is the beta subunit of a heterodimeric core-binding<br/>transcription factor belonging to the PEBP2/CBF transcription factor family which master-<br/>regulates a host of genes specific to hematopoiesis (e.g., RUNX1) and osteogenesis (e.g.,<br/>RUNX2). The beta subunit is a non-DNA binding regulatory subunit; it allosterically enhances<br/>DNA binding by alpha subunit as the complex binds to the core site of various enhancers and<br/>promoters, including murine leukemia virus, polyomavirus enhancer, T-cell receptor<br/>enhancers and GM-CSF promoters. Alternative splicing generates two mRNA variants, each<br/>encoding a distinct carboxyl terminus. In some cases, a pericentric inversion of chromosome<br/>16 \_ produces a chimeric transcript consisting of the N terminus of core-binding factor beta in<br/>a fusion with the C-terminal portion of the smooth muscle myosin heavy chain 11. This<br/>chromosomal rearrangement is associated with acute myeloid leukemia of the M4Eo<br/>subtype. Two transcript variants encoding different isoforms have been found for this gene.

Synonyms:

Protein Families:

Druggable Genome, Transcription Factors
