

Product datasheet for TA332812

HEXA Rabbit Polyclonal Antibody

Product data:

Product Type: Primary Antibodies

Applications:

Recommended Dilution: WB 1:500 - 1:2000 Reactivity: Human, Mouse, Rat

Host: Rabbit Isotype: lgG

Clonality: Polyclonal

Immunogen: Recombinant protein of human HEXA

Formulation: Store at -20°C (regular) and -80°C (long term). Avoid freeze / thaw cycles. Buffer: PBS with

0.02% sodium azide, 50% glycerol, pH7.3.

Concentration: lot specific

Purification: Affinity purification

Conjugation: Unconjugated

Storage: Store at -20°C as received.

Stability: Stable for 12 months from date of receipt.

Predicted Protein Size:

Gene Name: hexosaminidase subunit alpha

Database Link: NP 000511

Entrez Gene 15211 MouseEntrez Gene 300757 RatEntrez Gene 3073 Human

P06865

Background: This gene encodes the alpha subunit of the lysosomal enzyme beta-hexosaminidase that,

> together with the cofactor GM2 activator protein, catalyzes the degradation of the ganglioside GM2, and other molecules containing terminal N-acetyl hexosamines. Beta-hexosaminidase is composed of two subunits, alpha and beta, which are encoded by separate genes. Both beta-hexosaminidase alpha and beta subunits are members of family 20 of glycosyl

hydrolases. Mutations in the alpha or beta subunit genes lead to an accumulation of GM2 ganglioside in neurons and neurodegenerative disorders termed the GM2 gangliosidoses. Alpha subunit gene mutations lead to Tay-Sachs disease (GM2-gangliosidosis type I).

Synonyms: **TSD**

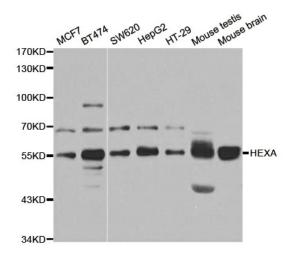

Protein Families: Druggable Genome

Amino sugar and nucleotide sugar metabolism, Glycosaminoglycan degradation, **Protein Pathways:**

Glycosphingolipid biosynthesis - ganglio series, Glycosphingolipid biosynthesis - globo series,

Lysosome, Metabolic pathways, Other glycan degradation
