

# Product datasheet for TA332954S

Recommended Dilution: WB 1:500 - 1:2000

# PKC beta 1 (PRKCB) Rabbit Polyclonal Antibody

ICC/IF, WB

Rabbit

Polyclonal

lot specific

Affinity purification

Store at -20°C as received.

protein kinase C beta

Unconjugated

NP 997700

P05771

lgG

**Primary Antibodies** 

Human, Mouse, Rat

Recombinant protein of human PRKCB

Stable for 12 months from date of receipt.

Entrez Gene 18751 MouseEntrez Gene 25023 RatEntrez Gene 5579 Human

PBS with 0.09% Sodium azide,50% glycerol,pH7.3.

	PKC beta 1 (PRKCB) Rabbit Polyclonal Antibody – TA332954S
Background:	Protein kinase C (PKC) is a family of serine- and threonine-specific protein kinases that can be activated by calcium and second messenger diacylglycerol. PKC family members phosphorylate a wide variety of protein targets and are known to be involved in diverse cellular signaling pathways. PKC family members also serve as major receptors for phorbol esters, a class of tumor promoters. Each member of the PKC family has a specific expression profile and is believed to play a distinct role in cells. The protein encoded by this gene is one of the PKC family members. This protein kinase has been reported to be involved in many different cellular functions, such as B cell activation, apoptosis induction, endothelial cell proliferation, and intestinal sugar absorption. Studies in mice also suggest that this kinase may also regulate neuronal functions and correlate fear-induced conflict behavior after stress. Alternatively spliced transcript variants encoding distinct isoforms have been reported.
Synonyms:	PKC-beta; PKCB; PRKCB1; PRKCB2
Protein Families:	Druggable Genome, Protein Kinase
Protein Pathway	B cell receptor signaling pathway, Calcium signaling pathway, Chemokine signaling pathway, ErbB signaling pathway, Fc epsilon RI signaling pathway, Fc gamma R-mediated phagocytosis, Focal adhesion, Gap junction, Glioma, GnRH signaling pathway, Leukocyte transendothelial migration, Long-term depression, Long-term potentiation, MAPK signaling pathway, Melanogenesis, Natural killer cell mediated cytotoxicity, Non-small cell lung cancer, Pathways in cancer, Phosphatidylinositol signaling system, Tight junction, Vascular smooth muscle contraction, VEGF signaling pathway, Vibrio cholerae infection, Wnt signaling pathway
