# **CRIGENE** TCF7L2 Rabbit Polyclonal Antibody – TA333646

Background:	The TCL7L2 is a high mobility group (HMG) box-containing transcription factor implicated in blood glucose homeostasis. The study of Yi et al. suggested that TCL7L2 acts through regulation of proglucagon through repression of the proglucagon gene in enteroendocrine cells via the Wnt signaling pathway. The TCL7L2 gene product is a high mobility group (HMG) box-containing transcription factor implicated in blood glucose homeostasis. The study of Yi et al. (2005) [PubMed 15525634] suggested that TCL7L2 acts through regulation of proglucagon (MIM 138030) through repression of the proglucagon gene in enteroendocrine cells via the Wnt signaling pathway. [supplied by OMIM]. Sequence Note: This gene (TCF7L2, alias TCF-4) is distinct from TCF4. Publication Note: This RefSeq record includes a subset of the publications that are available for this gene.
