Product datasheet for TA336715

AGR2 Rabbit Polyclonal Antibody

Product data:

| Product Type: | Primary Antibodies |
|-----------------------|---|
| Applications: | IF, IHC |
| Recommended Dilution: | Immunohistochemistry-Paraffin: 1:100-1:300, ICC/IF (Negative), Immunohistochemistry: 1:100-1:300 |
| Reactivity: | Human, Mouse |
| Host: | Rabbit |
| Clonality: | Polyclonal |
| Immunogen: | Synthetic peptide made to an internal portion of human AGR2 (within residues 50-100). [Swiss-Prot# O95994] |
| Formulation: | PBS, 0.05% Sodium Azide. Store at 4C short term. Aliquot and store at -20C long term. Avoid freeze-thaw cycles. |
| Concentration: | lot specific |
| Purification: | Immunogen affinity purified |
| Conjugation: | Unconjugated |
| Storage: | Store at -20°C as received. |
| Stability: | Stable for 12 months from date of receipt. |
| Gene Name: | anterior gradient 2, protein disulphide isomerase family member |
| Database Link: | <u>NP_006399</u> <u>Entrez Gene 23795 MouseEntrez Gene 10551 Human</u> <u>O95994</u> |

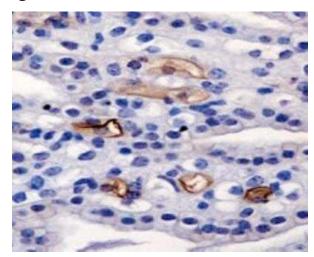

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2024 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

GRIGENE AGR2 Rabbit Polyclonal Antibody – TA336715

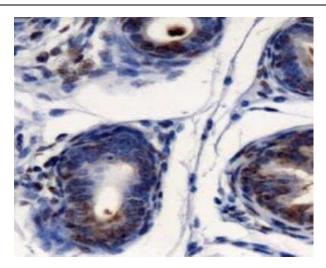

| Background: | Originally discovered in Xenopus laevis wherein it plays a role during early neural development, AGR2 (anterior gradient protein 2 homolog) is now known as a member of protein disulfide isomerase (PDI) family of ER-resident proteins which is expressed in a variety of normal as well as transformed epithelial tissues. AGR2 has been implicated in the folding of proteins as a chaperone protein. It interacts with LYPD3, DAG1 (alphaDAG1) and MUC2 (disulfide-linked), and is essential for MUC2 translation as well as secretion. AGR2 plays a key role in the production of mucus by intestinal cells and has also been suggested to be a proto-oncogene that may involve in cellular migration, differentiation and growth. Differential expression of AGR2 was first found in estrogen receptor (ER)-positive breast cancer cell lines and subsequently, elevated AGR2 levels have been seen in subsets of other cancers also wherein its upregulation enhances classical hallmarks of cancer such as metastasis, invasion, colony formation, and proliferation. |
|-------------------|--|
| Synonyms: | AG2; GOB-4; HAG-2; HEL-S-116; PDIA17; XAG-2 |
| Note: | This AGR2 antibody is useful for Immunohistochemistry paraffin embedded sections. It is not applicable for Immunocytochemistry/Immunofluorescence. |
| Protein Families: | Secreted Protein |
