|                  | Reticulon 1 (RTN1) Rabbit Polyclonal Antibody – TA338453  |
|------------------|---|
| Background:      | Reticulons are associated with the endoplasmic reticulum, and are involved in<br>neuroendocrine secretion or in membrane trafficking in neuroendocrine cells. This gene<br>belongs to the family of reticulon encoding genes. Reticulons are associated with the<br>endoplasmic reticulum, and are involved in neuroendocrine secretion or in membrane<br>trafficking in neuroendocrine cells. Alternatively spliced transcript variants encoding different<br>isoforms have been identified. Multiple promoters rather than alternative splicing of internal<br>exons seem to be involved in this diversity. |
