	MPP2 Rabbit Polyclonal Antibody – TA342242
Background:	Palmitoylated membrane protein 2 is a member of a family of membrane-associated proteins termed MAGUKs (membrane-associated guanylate kinase homologs). MAGUKs interact withThe cytoskeleton and regulate cell proliferation, signaling pathways, and intracellular junctions. Palmitoylated membrane protein 2 contains a conserved sequence, calledThe SH3 (src homology 3) motif, found in several other proteins that associate withThe cytoskeleton and are suspected to play important roles in signal transduction.
