

# Product datasheet for TA343593

### PPAR delta (PPARD) Rabbit Polyclonal Antibody

### **Product data:**

#### **Product Type: Primary Antibodies Applications:** IHC, WB Recommended Dilution: WB **Reactivity:** Human Rabbit Host: Isotype: lgG Polyclonal **Clonality:** Immunogen: The immunogen for anti-PPARD antibody: synthetic peptide directed towards the n terminal of human PPARD. Synthetic peptide located within the following region: MEQPQEEAPEVREEEEKEEVAEAEGAPELNGGPQHALPSSSYTDLSRSSS Formulation: Liquid. Purified antibody supplied in 1x PBS buffer with 0.09% (w/v) sodium azide and 2% sucrose. Note that this product is shipped as lyophilized powder to China customers. **Purification:** Affinity Purified **Conjugation:** Unconjugated Store at -20°C as received. Storage: Stability: Stable for 12 months from date of receipt. **Predicted Protein Size:** 49 kDa Gene Name: peroxisome proliferator activated receptor delta Database Link: NP 001165289 Entrez Gene 5467 Human <u>Q03181</u>

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2022 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

|                   | PPAR delta (PPARD) Rabbit Polyclonal Antibody – TA343593  |
|-------------------|---|
| Background:       | PPARD is a member of the peroxisome proliferator-activated receptor (PPAR) family. PPARs<br>are nuclear hormone receptors that bind peroxisome proliferators and control the size and<br>number of peroxisomes produced by cells. PPARs mediate a variety of biological processes,<br>and may be involved in the development of several chronic diseases, including diabetes,<br>obesity, atherosclerosis, and cancer. This protein is a potent inhibitor of ligand-induced<br>transcription activity of PPAR delta and PPAR gamma. It may function as an integrator of<br>transcription repression and nuclear receptor signaling. The expression of this gene is found<br>to be elevated in colorectal cancer cells. The elevated expression can be repressed by<br>adenomatosis polyposis coli (APC), a tumor suppressor protein related to APC/beta-catenin<br>signaling pathway. Knockout studies in mice suggested the role of this protein in myelination<br>of the corpus callosum, lipid metabolism, and epidermal cell proliferation. |
| Synonyms:         | FAAR; NR1C2; NUC1; NUCI; PPARB  |
| Note:             | lmmunogen Sequence Homology: Human: 100%; Pig: 93%; Rat: 93%; Horse: 93%; Guinea pig:<br>93%; Yeast: 90%; Mouse: 86%; Bovine: 80%; Dog: 79%; Rabbit: 79%  |
| Protein Families: | Druggable Genome, Nuclear Hormone Receptor, Transcription Factors   |
| Protein Pathway   | <b>s:</b> Acute myeloid leukemia, Pathways in cancer, PPAR signaling pathway, Wnt signaling pathway   |
