# Product datasheet for TA344544

### **TAF1C Rabbit Polyclonal Antibody**

#### **Product data:**

| Product Type:           | Primary Antibodies   |
|-------------------------|--|
| Applications:           | WB   |
| Recommended Dilution:   | WB   |
| Reactivity:             | Human  |
| Host:                   | Rabbit   |
| lsotype:                | IgG  |
| Clonality:              | Polyclonal   |
| Immunogen:              | The immunogen for anti-TAF1C antibody: synthetic peptide directed towards the N terminal of human TAF1C. Synthetic peptide located within the following region: MDFPSSLRPALFLTGPLGLSDVPDLSFMCSWRDALTLPEAQPQNSENGAL |
| Formulation:            | Liquid. Purified antibody supplied in 1x PBS buffer with 0.09% (w/v) sodium azide and 2% sucrose.<br>Note that this product is shipped as lyophilized powder to China customers.                                   |
| Purification:           | Affinity Purified  |
| Conjugation:            | Unconjugated   |
| Storage:                | Store at -20°C as received.  |
| Stability:              | Stable for 12 months from date of receipt.   |
| Predicted Protein Size: | 95 kDa   |
| Gene Name:              | TATA-box binding protein associated factor, RNA polymerase I subunit C   |
| Database Link:          | <u>NP_005670</u><br><u>Entrez Gene 9013 Human</u><br><u>Q15572</u>   |

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2022 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

## Service TAF1C Rabbit Polyclonal Antibody – TA344544

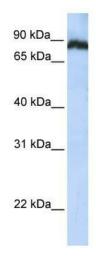

| Background: | Initiation of transcription by RNA polymerase I requires the formation of a complex<br>composed of the TATA-binding protein (TBP) and three TBP-associated factors (TAFs) specific<br>for RNA polymerase I. This complex, known as SL1, binds to the core promoter of ribosomal<br>RNA genes to position the polymerase properly and acts as a channel for regulatory signals.<br>TAF1C is the largest SL1-specific TAF. Initiation of transcription by RNA polymerase I requires<br>the formation of a complex composed of the TATA-binding protein (TBP) and three TBP-<br>associated factors (TAFs) specific for RNA polymerase I. This complex, known as SL1, binds to<br>the core promoter of ribosomal RNA genes to position the polymerase properly and acts as a<br>channel for regulatory signals. This gene encodes the largest SL1-specific TAF. Two transcripts<br>encoding different isoforms have been identified. |
|-------------|--|
| Synonyms:   | MGC:39976; SL1; TAFI95; TAFI110  |
| Note:       | Immunogen Sequence Homology: Human: 100%; Pig: 93%; Rat: 93%; Horse: 93%; Bovine:  |

93%; Guinea pig: 93%; Dog: 86%; Mouse: 77%

Protein Families:

Transcription Factors

#### **Product images:**

WB Suggested Anti-TAF1C Antibody Titration: 0.2-1 ug/ml; ELISA Titer: 1:62500; Positive Control: Jurkat cell lysateTAF1C is strongly supported by BioGPS gene expression data to be expressed in Human Jurkat cells
