Background: TRIM35 is a member of the tripartite motif (TRIM) family. The TRIM motif includes three zinc-

binding domains, a RING, a B-box type 1 and a B-box type 2, and a coiled-coil region. TRIM35 may play a role as a tumor suppressor, and is implicated in the cell death mechanism. The protein encoded by this gene is a member of the tripartite motif (TRIM) family. The TRIM motif includes three zinc-binding domains, a RING, a B-box type 1 and a B-box type 2, and a

coiled-coil region. The function of this protein has not been identified.
