### **CRIGENE** LXN Rabbit Polyclonal Antibody – TA349384

ECI; TCI

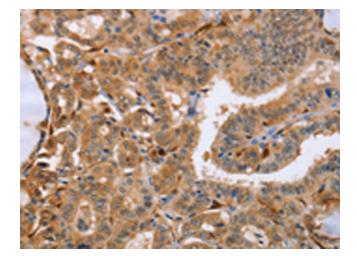

Background:Latexin, also designated endogenous carboxypeptidase inhibitor (ECI) or tissue<br/>carboxypeptidase inhibitor (TCI), belongs to the protease inhibitor I47 family of proteins.<br/>Latexin acts as a non-competitive, reversible inhibitor for metallocarboxypeptidases (MCPs),<br/>including CPA1, CPA2 and CPA4. It is a cytoplasmic protein that is highly expressed in heart,<br/>prostate, pancreas, ovary, kidney, brain and colon. Latexin consists of two topologically<br/>equivalent subdomains that bind to MCPs with low specificity, which gives it with the flexibility<br/>to inhibit all vertebrate A/B MCPs.
