

## **Product datasheet for TA349719S**

## **BPI Rabbit Polyclonal Antibody**

## **Product data:**

**Product Type:** Primary Antibodies

Applications: IHC

Recommended Dilution: IHC: 50-200

Positive control: Human thyroid cancer Predicted cell location: Cytoplasm

Reactivity: Human
Host: Rabbit
Isotype: IgG

Clonality: Polyclonal

Immunogen: Fusion protein of human BPI

**Formulation:** pH7.4 PBS, 0.05% NaN3, 40% Glyceroln

**Purification:** Antigen affinity purification

**Conjugation:** Unconjugated

**Storage:** Store at -20°C as received.

Stability: Stable for 12 months from date of receipt.

Gene Name: bactericidal/permeability-increasing protein

Database Link: NP 001716

Entrez Gene 671 Human

P17213

**Background:** This gene encodes a lipopolysaccharide binding protein. It is associated with human

neutrophil granules and has bactericidal activity on gram-negative organisms. The cytotoxic action of BPI is limited to many species of Gram-negative bacteria; this specificity may be explained by a strong affinity of the very basic N-terminal half for the negatively charged lipopolysaccharides that are unique to the Gram-negative bacterial outer envelope. Has antibacterial activity against the Gram-nagative bacterium P.aeruginosa, this activity is

inhibited by LPS from P.aeruginosa.

Synonyms: BPIFD1; rBPI

**Protein Families:** Druggable Genome, Transmembrane

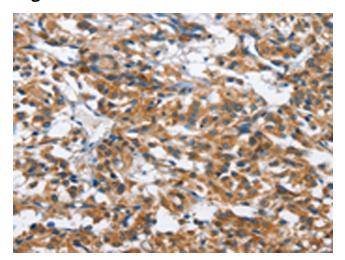

**OriGene Technologies, Inc.** 9620 Medical Center Drive, Ste 200
