	CARD14 Rabbit Polyclonal Antibody – TA349746
Background:	This gene encodes a caspase recruitment domain-containing protein that is a member of the membrane-associated guanylate kinase (MAGUK) family of proteins. Members of this protein family are scaffold proteins that are involved in a diverse array of cellular processes including cellular adhesion, signal transduction and cell polarity control. This protein has been shown to specifically interact with BCL10, a protein known to function as a positive regulator of cell apoptosis and NF-kappaB activation. Alternate splicing results in multiple transcript variants.
Synonyms:	BIMP2; CARMA2; PRP; PSORS2; PSS1

Protein Families: Druggable Genome
