

Product datasheet for TA350141S

LRDD (PIDD1) Rabbit Polyclonal Antibody

Product data:

Product Type: Primary Antibodies

Applications: IHC

Recommended Dilution: IHC: 100-300

Positive control: Human thyroid cancer Predicted cell location: Cytoplasm

Reactivity: Human
Host: Rabbit
Isotype: IgG

Clonality: Polyclonal

Immunogen: Fusion protein of human PIDD1

Formulation: pH7.4 PBS, 0.05% NaN3, 40% Glyceroln

Purification: Antigen affinity purification

Conjugation: Unconjugated

Storage: Store at -20°C as received.

Stability: Stable for 12 months from date of receipt.

Gene Name: p53-induced death domain protein 1

Database Link: NP 060964

Entrez Gene 55367 Human

Q9HB75

Background: The protein encoded by this gene contains a leucine-rich repeat and a death domain. This

protein has been shown to interact with other death domain proteins, such as Fas (TNFRSF6)-associated via death domain (FADD) and MAP-kinase activating death domain-containing protein (MADD), and thus may function as an adaptor protein in cell death-related signaling processes. The expression of the mouse counterpart of this gene has been found to be positively regulated by the tumor suppressor p53 and to induce cell apoptosis in response to DNA damage, which suggests a role for this gene as an effector of p53-dependent apoptosis.

LRDD (PIDD1) Rabbit Polyclonal Antibody - TA350141S

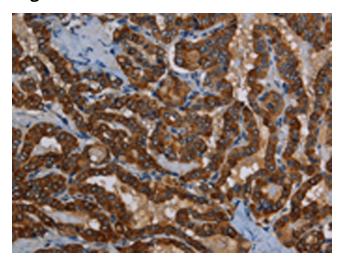

Synonyms: DKFZp434D229; leucine-rich and death domain containing; leucine-rich repeats and death

domain containing; leucine rich repeat and death domain containing protein; MGC16925;

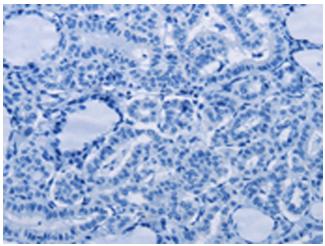

PIDD

Protein Families: Druggable Genome
Protein Pathways: p53 signaling pathway
