

Product datasheet for TA350367S

ROBO4 Rabbit Polyclonal Antibody

Product data:

Product Type:	Primary Antibodies
Applications:	IHC
Recommended Dilution:	IHC: 25-100 Positive control: Human liver cancer Predicted cell location: Cytoplasm
Reactivity:	Human
Host:	Rabbit
lsotype:	IgG
Clonality:	Polyclonal
Immunogen:	Fusion protein of human ROBO4
Formulation:	pH7.4 PBS, 0.05% NaN3, 40% Glyceroln
Purification:	Antigen affinity purification
Conjugation:	Unconjugated
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Gene Name:	roundabout guidance receptor 4
Database Link:	<u>NP_061928</u> <u>Entrez Gene 54538 Human</u> <u>Q8WZ75</u>

GRIGENE ROBO4 Rabbit Polyclonal Antibody – TA350367S

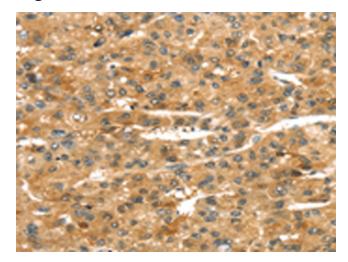

Background:Robo4 (roundabout homolog 4 or magic roundabout) is a receptor for Slit proteins which
implicate in angiogenesis and vascular patterning especially through facilitating inhibition of
primary endothelial cell migration. It is a fairly recently identified member of Robo family and
is shorter than other Robo members at both intracellular as well as extracellular domains.
Robo4 plays important roles in several aspects of vascular development such as the guidance
of endothelial cell migration, cell cycle regulation, inhibition of pathologic angiogenesis and
endothelial hyperpermeability etc. Employing mouse and zebrafish models, Slit2/Robo4
interactions have been shown to maintain integrity of vascular network and its barrier
function by inhibiting cytokine-mediated vasculogenesis with enhanced permeability, and
that Slit2-Robo4-paxillin-GIT1 network inhibits neovascularization and vascular leakage.
Moreover, single nucleotide polymorphorism of Robo4 has been documented to be
associated with autism suggesting its role in development and function of human brain.

Synonyms: ECSM4; MRB

Protein Families:

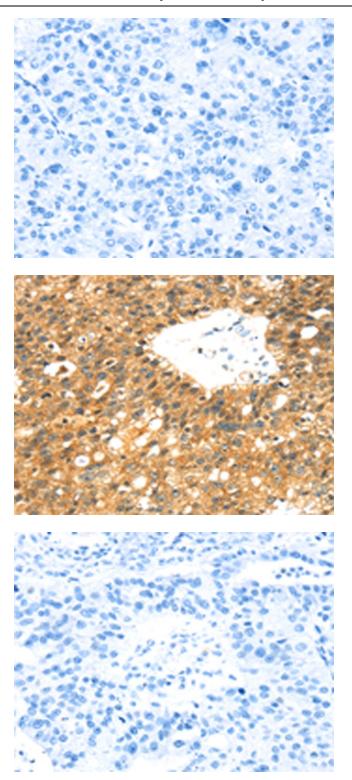

Druggable Genome
