Background: This gene encodes a member of the hyperpolarization-activated cyclic nucleotide-gated

potassium channels. The encoded protein shows slow kinetics of activation and inactivation,

and is necessary for the cardiac pacemaking process. This channel may also mediate

responses to sour stimuli. Mutations in this gene have been linked to sick sinus syndrome 2,

also known as atrial fibrillation with bradyarrhythmia or familial sinus bradycardia. Two

pseudogenes have been identified on chromosome 15.

Synonyms: SSS2

Protein Families: Druggable Genome, Ion Channels: Cyclic nucleotide gated, Transmembrane
