

## Product datasheet for **TA350727S**

### **ABIN3 (TNIP3) Rabbit Polyclonal Antibody**

#### **Product data:**

Product Type:	Primary Antibodies
Applications:	WB
Recommended Dilution:	WB: 200-1000 WB positive control: Mouse brain tissue
Reactivity:	Human, Mouse
Host:	Rabbit
Isotype:	IgG
Clonality:	Polyclonal
Immunogen:	Synthetic peptide of human TNIP3
Formulation:	pH7.4 PBS, 0.05% NaN <sub>3</sub> , 40% Glycerol
Purification:	Antigen affinity purification
Conjugation:	Unconjugated
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Predicted Protein Size:	39 kDa
Gene Name:	TNFAIP3 interacting protein 3
Database Link:	<a href="#">NP_079149</a> <a href="#">Entrez Gene 414084 Mouse</a> <a href="#">Entrez Gene 79931 Human</a> <a href="#">Q96KP6</a>
Background:	TNIP3, which called LIND, that was upregulated in monocytes infected with <i>Listeria</i> monocytogenes. The predicted 325-amino acid protein contains 3 coiled-coil domains and is most likely localized to the nucleus. Binds to zinc finger protein TNFAIP3 and inhibits NF-kappa-B activation induced by tumor necrosis factor, Toll-like receptor 4 (TLR4), interleukin-1 and 12-O-tetradecanoylphorbol-13-acetate. Overexpression inhibits NF-kappa-B-dependent gene expression in response to lipopolysaccharide at a level downstream of TRAF6 and upstream of IKK $\beta$ . NF-kappa-B inhibition is independent of TNFAIP3 binding.
Synonyms:	ABIN-3; LIND

**Product images:**

Gel: 8%SDS-PAGE

Lysate: 40  $\mu$ g

Lane: Mouse brain tissue

Primary antibody: [TA350727] (TNIP3 Antibody) at dilution 1/200

Secondary antibody: Goat anti rabbit IgG at 1/8000 dilution

Exposure time: 1 minute
