

Product datasheet for TA351287

IL5RA Rabbit Polyclonal Antibody

Product data:

Product Type: Primary Antibodies Applications: IHC, WB Recommended Dilution: WB: 200-1000 WB positive control: Mouse heart tissue IHC: 50-200 Positive control: Human thyroid cancer Predicted cell location: Cytoplasm **Reactivity:** Human, Mouse Host: Rabbit Isotype: lgG **Clonality:** Polyclonal Immunogen: Synthetic peptide of human IL5RA pH7.4 PBS, 0.05% NaN3, 40% Glyceroln Formulation: Concentration: lot specific **Purification:** Antigen affinity purification **Conjugation:** Unconjugated Storage: Store at -20°C as received. Stability: Stable for 12 months from date of receipt. Predicted Protein Size: 48 kDa Gene Name: interleukin 5 receptor subunit alpha Database Link: NP 783855 Entrez Gene 3568 Human Q01344

GRIGENE ILSRA Rabbit Polyclonal Antibody – TA351287

| Background: | The protein encoded by this gene is an interleukin 5 specific subunit of a heterodimeric |
|-------------|--|
| | cytokine receptor. The receptor is comprised of a ligand specific alpha subunit and a signal |
| | transducing beta subunit shared by the receptors for interleukin 3 (IL3), colony stimulating |
| | factor 2 (CSF2/GM-CSF), and interleukin 5 (IL5). The binding of this protein to IL5 depends on |
| | the beta subunit. The beta subunit is activated by the ligand binding, and is required for the |
| | biological activities of IL5. This protein has been found to interact with syndecan binding |
| | protein (syntenin), which is required for IL5 mediated activation of the transcription factor |
| | SOX4. Several alternatively spliced transcript variants encoding four distinct isoforms have |
| | been reported. |

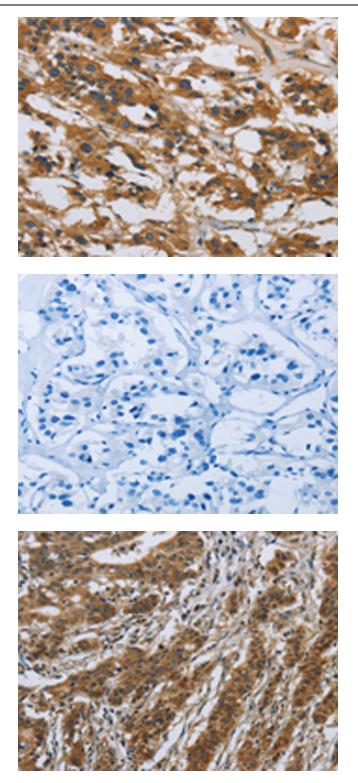

| Synonyms: | CD125; CDw125; HSIL5R3; IL5R |
|-------------------|--|
| Protein Families: | Druggable Genome, Transmembrane |
| Protein Pathways: | Cytokine-cytokine receptor interaction, Hematopoietic cell lineage, Jak-STAT signaling pathway |
