

Product datasheet for TA351360

LOXL2 Rabbit Polyclonal Antibody

Product data:

Product Type: Primary Antibodies

Applications: IHC

Recommended Dilution: IHC: 25-100

Positive control: Human ovarian cancer

Predicted cell location: Cytoplasm

Reactivity: Human, Mouse, Rat

Host: Rabbit Isotype: IgG

Clonality: Polyclonal

Immunogen: Synthetic peptide of human LOXL2

Formulation: pH7.4 PBS, 0.05% NaN3, 40% Glyceroln

Concentration: lot specific

Purification: Antigen affinity purification

Conjugation: Unconjugated

Storage: Store at -20°C as received.

Stability: Stable for 12 months from date of receipt.

Gene Name: lysyl oxidase like 2

Database Link: NP 002309

Entrez Gene 94352 MouseEntrez Gene 290350 RatEntrez Gene 4017 Human

Q9Y4K0

Background: This gene encodes a member of the lysyl oxidase gene family. The prototypic member of the

family is essential to the biogenesis of connective tissue, encoding an extracellular copperdependent amine oxidase that catalyses the first step in the formation of crosslinks in collagens and elastin. A highly conserved amino acid sequence at the C-terminus end appears to be sufficient for amine oxidase activity, suggesting that each family member may

retain this function. The N-terminus is poorly conserved and may impart additional roles in developmental regulation, senescence, tumor suppression, cell growth control, and

de respense de la constante de

chemotaxis to each member of the family.
