Androgen Receptor (AR) Rabbit Polyclonal Antibody

Product data:

Product Type: Primary Antibodies

Applications: Dot, WB

Recommended Dilution: WB 0.1-1 μg/ml ELISA 0.01-0.1 μg/ml IP 2-5 μg/ml IHC 2-10 μg/ml FC 5-10 μg/ml

Reactivity: Human, Mouse, Rat

Host: Rabbit Isotype: IgG

Clonality: Polyclonal

Immunogen: A synthetic peptide surrounding the epitope –EASGA- without phosphorylation. This

sequence is identical among human, rat, mouse, dog.

Formulation: This affinity purified antibody is supplied in sterile Tris-buffered saline (pH7.2) containing

antibody stabilizer.

Purification: The Rabbit IgG is purified by Epitope Affinity Purification

Conjugation: Unconjugated

Storage: Store at -20°C as received.

Stability: Stable for 12 months from date of receipt.

Predicted Protein Size: 110 kDa

Gene Name: androgen receptor

Database Link: NP 000035

P10275

Background: The androgen receptor (AR), a member of nuclear receptor family, is essential for the growth

of prostate cancer cells. The phosphorylation of AR is induced by growth factors and elevated

in hormone-refractory prostate tumors. It's been reported the signal pathway of the PI3K/AKT, Src to be responsible for phosphorylation of AR at Ser213/210 and Ser81. The

abnormal activation of AR is observed in many diseases, such as prostate cancer.

Synonyms: AIS; AR8; DHTR; HUMARA; HYSP1; KD; NR3C4; SBMA; SMAX1; TFM

Protein Families: Druggable Genome, Nuclear Hormone Receptor, Transcription Factors

Protein Pathways: Oocyte meiosis, Pathways in cancer, Prostate cancer

Product images:

WB: 5 mg of the whole cell lysate derived from conditioned LNCaP were immunoprecipitated by 4 ug of Rabbit anti-AR (pSer210) (lane 1) or pre adsorbed by immunization peptide (lane 2) followed by rabbit anti-AR (NT) at 1:500.

DB: 1 ug peptide was blot onto NC membrane A: AR (pS210) B: AR (Nonphospho); were blotted at a 1:2000 dilution by: 1: Rabbit anti-AR (pS210), ; 2: Rabbit anti-AR (paired 210)
