FUT4 Rabbit Polyclonal Antibody

Product data:

Product Type: Primary Antibodies

Recommended Dilution: WB 0.1-1 μg/ml ELISA 0.01-0.1 μg/ml IP 2-5 μg/ml IHC 2-10 μg/ml FC 5-10 μg/ml

Reactivity: Human

Host: Rabbit

Isotype: IgG

Clonality: Polyclonal

Immunogen: The Synthetic peptide corresponding to the C-term of human SSEA1 protein.

Formulation: This affinity purified antibody is supplied in sterile Phosphate buffered saline (pH7.2)

containing antibody stabilizer.

Purification: The Rabbit IgG is purified by Epitope Affinity Purification

Conjugation: Unconjugated

Storage: Store at -20°C as received.

Stability: Stable for 12 months from date of receipt.

Predicted Protein Size: 59 kDa

Gene Name: fucosyltransferase 4

Database Link: NP 002024

Entrez Gene 2526 Human

P22083

Background: CD15 is an antigen present on myelomonocytic cells and Lacto-Nfucopentose III (also known

as hapten X). It is present on greater than 90% of granulocytes including neutrophils and eosinophils, and to a lesser degree, on monocytes. CD15 is expressed in Reed-Sternberg cells of Hodgkin's disease (of the nodular sclerosis, mixed cellularity and lymphocyte-depleted subtypes). This antibody recognizes myeloid cells, mainly granulocytes but not on B cells, T cells, monocytes, erythrocytes or platelets. Positive staining for CD15 combined with a negative reaction for lymphocytic markers may provide support for Hodgkin's disease. Fifty

percent or more of adenocarcinomas have been described as showing significant

cytoplasmic positivity for CD15. It does not detect most mesotheliomas.

Synonyms: CD15; ELFT; FCT3A; FUC-TIV; FUTIV; LeX; SSEA-1

FUT4 Rabbit Polyclonal Antibody - TA354861

Protein Families: Transmembrane

Protein Pathways: Glycosphingolipid biosynthesis - lacto and neolacto series, Metabolic pathways
