PD L2 (PDCD1LG2) Mouse Monoclonal Antibody [Clone ID: 7C1]

Product data:

Product Type: Primary Antibodies

Clone Name: 7C1

Applications: FC, IF, IHC, WB

Recommended Dilution: WB: 0.5-1μg/mL.IHC starting at 2μg/mL.IF start at 20μg/mL.

Reactivity: Human
Host: Mouse
Isotype: IgG2b

Clonality: Monoclonal

Immunogen: PD-L2 antibody was raised against the extracellular domain of human PD-L2.

Formulation: PD-L2 Antibody is supplied in PBS containing 0.02% sodium azide.

Concentration: 1 mg/ml

Purification: PD-L2 Antibody is supplied as protein A purified IgG2b.

Conjugation: Unconjugated

Storage: Store at -20°C as received.

Stability: Stable for 12 months from date of receipt.

Predicted Protein Size: Predicted: 30 kDa; Observed: 38 kDa

Gene Name: programmed cell death 1 ligand 2

Database Link: NP 079515

Entrez Gene 80380 Human

Q9BQ51

Background: PD-L2 Antibody: Cell-mediated immune responses are initiated by T lymphocytes that are

themselves stimulated by co gnate peptides bound to MHC molecules on antigen-presenting cells (APC). T-cell activation is generally self-limited as activated T cells express receptors such as PD-1 (also known as PDCD-1) that mediate inhibitory signals from the APC. PD-1 can bind two different but related ligands, PD-L1 and PD-L2, both of which are thought act as a negative regulator of T cell activation. However, it has been suggested that PD-L2 can act to

stimulate an immunogenic response through and alternative receptor from PD-1.

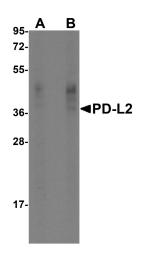

Synonyms:

Note:

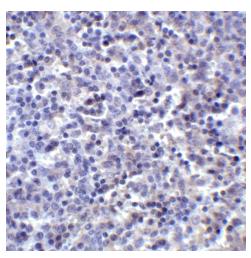

B7-DC; B7DC; bA574F11.2; Btdc; CD273; MGC142238; MGC142240; PD-L2; PDCD1L2; PDL2

PD-L2 antibody can be used for detection of PD-L2 by Western blot at 0.5 - 1 μ g/mL. Antibody can also be used for immunohistochemistry starting at 2 μ g/mL. For immunofluorescence start at 20 μ g/mL.
