## PD-L1 (CD274) Mouse Monoclonal Antibody [Clone ID: 6H10]

#### **Product data:**

**Product Type:** Primary Antibodies

Clone Name: 6H10

Applications: IF, IHC, WB

**Recommended Dilution:** WB: 0.5-1µg/mL. IHC starting at 2-5µg/mL.IF start at 5µg/mL.

Reactivity: Human
Host: Mouse
Isotype: IgG1

Clonality: Monoclonal

**Immunogen:** PD-L1 antibody was raised against the extracellular domain of human PD-L1.

**Formulation:** PD-L1 Antibody is supplied in PBS containing 0.02% sodium azide.

Concentration: 1 mg/ml

**Purification:** PD-L1 Antibody is supplied as protein A purified IgG1.

Conjugation: Unconjugated

**Storage:** Store at -20°C as received.

**Stability:** Stable for 12 months from date of receipt.

Predicted Protein Size: Predicted: 32 kDa; Observed: 45 kDa

**Gene Name:** CD274 molecule

Database Link: NP 054862

Entrez Gene 29126 Human

Q9NZQ7

Background:

PD-L1 Antibody: Cell-mediated immune responses are initiated by T lymphocytes that are themselves stimulated by cognate peptides bound to MHC molecules on antigen-presenting cells (APC) (1). T-cell activation is generally self-limited as activated T cells express receptors such as PD-1 (also known as PDCD-1) that mediate inhibitory signals from the APC (2). PD-1 can bind two different but related ligands, PD-L1 and PD-L2. PD-L1 is a B7-related protein that inhibits cell-mediated immune responses by reducing the secretion of IL-2 and IL-10 from memory T cells (3). This suggests that PD-L1 may be useful in reducing allogenic CD4+ memory T-cell responses to endothelial cells, thereby reducing the likelihood of host immune responses to allografts. PD-L1 also functions as an immune checkpoint protein, and multiple anti-PD-L1 antibodies are currently in phase II and III clinical trials, with one antibody already approved for the treatment of cancer (4).

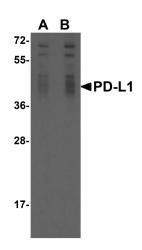

Synonyms:

B7-H; B7-H1; B7H1; MGC142294; MGC142296; PD-L1; PDCD1L1; PDCD1LG1; PDL1

Note:

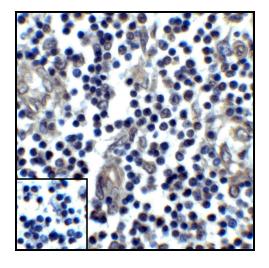

PD-L1 antibody can be used for detection of PD-L1 by Western blot at 0.5 - 1  $\mu$ g/mL. Antibody can also be used for immunohistochemistry starting at 2 - 5  $\mu$ g/mL. For immunofluorescence start at 5  $\mu$ g/mL.
