

Product datasheet for TA355146

SARS Spike protein antibody Rabbit Polyclonal Antibody

Product data:

Product Type:	Primary Antibodies
Applications:	ELISA
Reactivity:	SARS-CoV
Host:	Rabbit
lsotype:	IgG
Clonality:	Polyclonal
Immunogen:	Raised against a synthetic peptide corresponding to amino acids near the center of. SARS Spike glycoprotein.
Formulation:	PBS containing 0.02% sodium azide
Concentration:	lot specific
Purification:	Affinity chromatography purified via peptide column
Conjugation:	Unconjugated
Storage:	Can be stored at -20 °C. Avoid repeated freeze thaw cycles.
Stability:	one year from dispatch
Database Link:	<u>P59594</u>
Background:	A novel coronavirus has recently been identified as the causative agent of SARS (Severe Acute Respiratory Syndrome). Coronaviruses are a major cause of upper respiratory diseases in humans. The genomes of these viruses are positive-stranded RNA approximately 27-31kb in length. SARS infection can be mediated by the binding of the viral spike protein, a glycosylated 139 kDa protein and the major surface antigen of the virus, to the angiotensin-converting enzyme 2 (ACE2) on target cells. This binding can be blocked by a soluble form of ACE2.

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2022 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US
