# Product datasheet for TA356536

## **Transferrin Receptor 2 (TFR2) Rabbit Polyclonal Antibody**

### **Product data:**

Product Type:	Primary Antibodies
Applications:	IHC, WB
Reactivity:	Human
Host:	Rabbit
Clonality:	Polyclonal
Immunogen:	The immunogen is a synthetic peptide directed towards the middle region of human TFR2
Specificity:	<b>Expected reactivity</b> : Cow, Dog, Guinea Pig, Human, Mouse, Pig, Rabbit, Rat <b>Homology</b> : Cow: 93%; Dog: 93%; Guinea Pig: 86%; Human: 100%; Mouse: 100%; Pig: 93%; Rabbit: 100%; Rat: 100%
Formulation:	Liquid. Purified antibody supplied in 1x PBS buffer with 0.09% (w/v) sodium azide and 2% sucrose. Note that this product is shipped as lyophilized powder to China customers.
Concentration:	lot specific
Purification:	Affinity Purified
Conjugation:	Unconjugated
Storage:	For short term use, store at 2-8°C up to 1 week. For long term storage, store at -20°C in small aliquots to prevent freeze-thaw cycles.
Stability:	Shelf life: one year from despatch.
Predicted Protein Size:	89kDa
Gene Name:	transferrin receptor 2
Database Link:	<u>NP_003218</u> <u>Entrez Gene 7036 Human</u> <u>Q9UP52</u>

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2022 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

#### **GRIGENE** Transferrin Receptor 2 (TFR2) Rabbit Polyclonal Antibody – TA356536

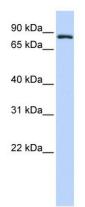

Background:TFR2,a member of the transferrin receptor-like family,is a single-pass type II membrane<br/>protein with a protease associated (PA) domain, an M28 peptidase domain and a transferrin<br/>receptor-like dimerization domain. This protein mediates cellular uptake of transferrin-bound<br/>iron and mutations in this gene have been associated with hereditary hemochromatosis type<br/>III. This gene is a member of the transferrin receptor-like family and encodes a single-pass<br/>type II membrane protein with a protease associated (PA) domain, an M28 peptidase domain<br/>and a transferrin receptor-like dimerization domain. This protein mediates cellular uptake of<br/>transferrin-bound iron and mutations in this gene have been associated (PA) domain, an M28 peptidase domain<br/>and a transferrin receptor-like dimerization domain. This protein mediates cellular uptake of<br/>transferrin-bound iron and mutations in this gene have been associated with hereditary<br/>hemochromatosis type III. Alternatively spliced variants which encode different protein<br/>isoforms have been described; however, not all variants have been fully characterized.<br/>Publication Note: This RefSeq record includes a subset of the publications that are available<br/>for this gene. Please see the Entrez Gene record to access additional publications.

Synonyms: HFE3; MGC126368; TFRC2

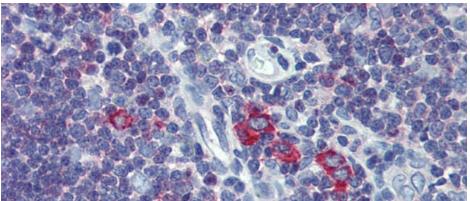

**Protein Families:** 

Druggable Genome, Protease, Transmembrane

#### **Product images:**

WB Suggested Anti-TFR2 Antibody Titration: 0.2-1 ug/ml ELISA Titer: 1:62500 Positive Control: Hela cell lysate

Immunohistochemistry with Human Thymus lysate tissue at an antibody concentration of 5.0ug/ml using anti-TFR2 antibody (TA356536)
