Background:	This gene, which has a previous symbol of UNG2, was erroneously identified as a uracil DNA glycosylase in PubMed ID: 2001396. A later publication, PubMed ID: 8419333, identified this gene's product as a cyclin protein family member. The UNG2 term is also used as a specific protein isoform name for the UNG gene, so confusion exists in the scientific literature and in some databases for these two genes.
Synonyms:	CCNU; FLJ22422; UDG2; UNG2
