# Product datasheet for TA359513

## **RPS19 Rabbit Polyclonal Antibody**

### **Product data:**

Product Type:	Primary Antibodies
Applications:	WB
Reactivity:	Human
Host:	Rabbit
Clonality:	Polyclonal
Immunogen:	The immunogen is a synthetic peptide directed towards the C-terminal region of Human RS19
Specificity:	Expected reactivity: Human
Formulation:	Liquid. Purified antibody supplied in 1x PBS buffer with 0.09% (w/v) sodium azide and 2% sucrose. Note that this product is shipped as lyophilized powder to China customers.
Concentration:	lot specific
Purification:	Affinity Purified
Conjugation:	Unconjugated
Storage:	For short term use, store at 2-8°C up to 1 week. For long term storage, store at -20°C in small aliquots to prevent freeze-thaw cycles.
Stability:	Shelf life: one year from despatch.
Predicted Protein Size:	15kDa
Gene Name:	ribosomal protein S19
Database Link:	<u>NP_001013</u> <u>Entrez Gene 6223 Human</u> <u>P39019</u>

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2022 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

#### **CRIGENE** RPS19 Rabbit Polyclonal Antibody – TA359513

Background:Ribosomes, the organelles that catalyze protein synthesis, consist of a small 40S subunit and<br/>a large 60S subunit. Together these subunits are composed of 4 RNA species and<br/>approximately 80 structurally distinct proteins. This gene encodes a ribosomal protein that is<br/>a component of the 40S subunit. The protein belongs to the S19E family of ribosomal<br/>proteins. It is located in the cytoplasm. Mutations in this gene cause Diamond-Blackfan<br/>anemia (DBA), a constitutional erythroblastopenia characterized by absent or decreased<br/>erythroid precursors, in a subset of patients. This suggests a possible extra-ribosomal<br/>function for this gene in erythropoietic differentiation and proliferation, in addition to its<br/>ribosomal function. Higher expression levels of this gene in some primary colon carcinomas<br/>compared to matched normal colon tissues has been observed. As is typical for genes<br/>encoding ribosomal proteins, there are multiple processed pseudogenes of this gene<br/>dispersed through the genome.

Synonyms:

DBA

## **Product images:**

Host: Rabbit Target Name: RS19 Sample Type: Fetal Kidney lysates Antibody Dilution: 1.0ug/ml
