## **Glycogenin 1 (GYG1) Rabbit Polyclonal Antibody**

#### **Product data:**

Clonality:

**Product Type:** Primary Antibodies

Applications: WB

Reactivity: Human Host: Rabbit

**Immunogen:** The immunogen is a synthetic peptide directed towards the middle region of human GYG1

**Specificity: Expected reactivity**: Human

Formulation: Liquid. Purified antibody supplied in 1x PBS buffer with 0.09% (w/v) sodium azide and 2%

sucrose

Polyclonal

Note that this product is shipped as lyophilized powder to China customers.

Concentration: lot specific

Purification:Affinity purifiedConjugation:Unconjugated

Storage: For short term use, store at 2-8°C up to 1 week. For long term storage, store at -20°C in small

aliquots to prevent freeze-thaw cycles.

**Stability:** Shelf life: one year from despatch.

Predicted Protein Size: 39 kDa

**Gene Name:** glycogenin 1

Database Link: <u>NP 001171649.1</u>

Entrez Gene 2992 Human

P46976

**Background:** This gene encodes a member of the glycogenin family. Glycogenin is a glycosyltransferase

that catalyzes the formation of a short glucose polymer from uridine diphosphate glucose in an autoglucosylation reaction. This reaction is followed by elongation and branching of the polymer, catalyzed by glycogen synthase and branching enzyme, to form glycogen. This gene is expressed in muscle and other tissues. Mutations in this gene result in glycogen storage

disease XV. This gene has pseudogenes on chromosomes 1, 8 and 13 respectively.

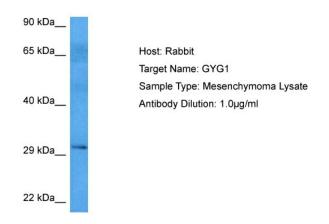

Alternatively spliced transcript variants encoding different isoforms have been identified.

**Synonyms:** glycogenin; GYG

# **Product images:**

Host: Rabbit Target Name: GYG1

Sample Tissue: Mesenchymoma lysates

Antibody Dilution: 1.0ug/ml
