Background:	Somatostatin-14 is a naturally occurring 14-residue peptide. It is found in the gastrointestinal tract and the pancreas, as well as in the central and peripheral nervous systems. Somatostatin-14 is a cyclic oligopeptide, which in mammals is found as a shorter 14-mer and a longer 28-mer. Because of its short biological half- life (few minutes), analogues have been developed for therapeutic application, such as Octreotide. This antibody was generated by immunization of rabbits with Somatostatin-14 coupled to a carrier protein.
Synonyms:	SMST; somatostatin; somatostatin-14; somatostatin-28
