

# **Product datasheet for TA364496**

# Integrin beta 5 (ITGB5) Rabbit Polyclonal Antibody

# **Product data:**

Product Type:	Primary Antibodies
Applications:	IHC
Recommended Dilution:	IHC: 25-100 Positive control: Human colon cancer Predicted cell location: Cytoplasm
Reactivity:	Human, Mouse
Host:	Rabbit
lsotype:	IgG
Clonality:	Polyclonal
Immunogen:	Fusion protein of human ITGB5
Formulation:	pH7.4 PBS, 0.05% NaN3, 40% Glycerol
Concentration:	lot specific
Purification:	Antigen affinity purification
Conjugation:	Unconjugated
Storage:	Store at -20°C.
Stability:	1 year
Gene Name:	integrin subunit beta 5
Database Link:	<u>Entrez Gene 3693 Human</u> <u>P18084</u>

# Integrin beta 5 (ITGB5) Rabbit Polyclonal Antibody - TA364496Background:Integrins are heterodimers composed of noncovalently associated transmembrane a and b<br/>subunits. The 16 a and 8 b subunits heterodimerize to produce more than 20 different<br/>receptors. Most integrin receptors bind ligands that are components of the extracellular<br/>matrix, including Fibronectin, Collagen and Vitronectin. Certain integrins can also bind to<br/>soluble ligands such as Fibrinogen, or to counterreceptors on adjacent cells such as the<br/>intracellular adhesion molecules (ICAMs), leading to aggregation of cells. Ligands serve to<br/>cross-link or cluster integrins by binding to adjacent integrin receptors; both receptor<br/>clustering and ligand occupancy are necessary for the activation of integrin-mediated<br/>responses. In addition to mediating cell adhesion and cytoskeletal organization, integrins<br/>function as signaling receptors.Synonyms:FLJ26658
