### **GRIGENE** spindlin 1 (SPIN1) Rabbit Polyclonal Antibody – TA364558S

Background:Chromatin reader that specifically recognizes and binds histone H3 both trimethylated at 'Lys-<br/>4' and asymmetrically dimethylated at 'Arg-8' (H3K4me3 and H3R8me2a) and acts as an<br/>activator of Wnt signaling pathway downstream of PRMT2. In case of cancer, promotes cell<br/>cancer proliferation via activation of the Wnt signaling pathway (PubMed:24589551).<br/>Overexpression induces metaphase arrest and chromosomal instability. Localizes to active<br/>rDNA loci and promotes the expression of rRNA genes (PubMed:21960006). May play a role in<br/>cell-cycle regulation during the transition from gamete to embryo. Involved in oocyte meiotic<br/>resumption, a process that takes place before ovulation to resume meiosis of oocytes<br/>blocked in prophase I: may act by regulating maternal transcripts to control meiotic<br/>resumption.

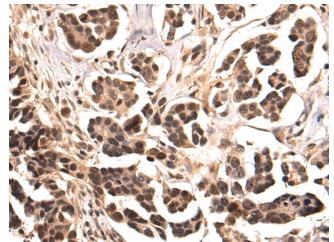

Synonyms:

OCR; SPIN; spindlin; SPNS1
