

# Product datasheet for TA364767

## EIF3S3 (EIF3H) Rabbit Polyclonal Antibody

IHC

IHC: 50-100

Rabbit

Polyclonal

lot specific

Unconjugated

Store at -20°C.

1 year

015372

lgG

**Primary Antibodies** 

Human, Mouse, Rat

Positive control: Human gastric cancer Predicted cell location: Cytoplasm

Fusion protein of human EIF3H

Antigen affinity purification

Entrez Gene 8667 Human

pH7.4 PBS, 0.05% NaN3, 40% Glycerol

eukaryotic translation initiation factor 3 subunit H

#### Service EIF3S3 (EIF3H) Rabbit Polyclonal Antibody – TA364767

Background: Component of the eukaryotic translation initiation factor 3 (eIF-3) complex, which is required for several steps in the initiation of protein synthesis (PubMed:17581632, PubMed:25849773, PubMed:27462815). The eIF-3 complex associates with the 40S ribosome and facilitates the recruitment of eIF-1, eIF-1A, eIF-2:GTP:methionyl-tRNAi and eIF-5 to form the 43S preinitiation complex (43S PIC). The eIF-3 complex stimulates mRNA recruitment to the 43S PIC and scanning of the mRNA for AUG recognition. The eIF-3 complex is also required for disassembly and recycling of post-termination ribosomal complexes and subsequently prevents premature joining of the 40S and 60S ribosomal subunits prior to initiation (PubMed:17581632). The eIF-3 complex specifically targets and initiates translation of a subset of mRNAs involved in cell proliferation, including cell cycling, differentiation and apoptosis, and uses different modes of RNA stem-loop binding to exert either translational activation or repression (PubMed:25849773).

Synonyms:

elF3-gamma; elF3-p40; ElF3S3; MGC102958
