

Product datasheet for TA365056S

TATA binding protein (TBP) Rabbit Polyclonal Antibody

Product data:

Product Type:	Primary Antibodies
Applications:	IHC, WB
Recommended Dilution:	WB: 200-1000 WB positive control: HEPG2 and Hela cell□Human testis tissue lysates IHC: 25-100 Positive control: Human gastric cancer Predicted cell location: Nucleus
Reactivity:	Human
Host:	Rabbit
lsotype:	IgG
Clonality:	Polyclonal
Immunogen:	Full length fusion protein
Formulation:	pH7.4 PBS, 0.05% NaN3, 40% Glycerol
Purification:	Antigen affinity purification
Conjugation:	Unconjugated
Storage:	Store at -20°C.
Stability:	1 year
Predicted Protein Size:	38 kDa
Gene Name:	TATA-box binding protein
Database Link:	<u>Entrez Gene 6908 Human</u> <u>P20226</u>
Background:	This gene encodes TBP, the TATA-binding protein. A distinctive feature of TBP is a long string of glutamines in the N-terminus. This region of the protein modulates the DNA binding activity of the C terminus, and modulation of DNA binding affects the rate of transcription complex formation and initiation of transcription. The number of CAG repeats encoding the

polyglutamine tract is usually 32-39, and expansion of the number of repeats increases the

length of the polyglutamine string and is associated with spinocerebellar ataxia 17, a

neurodegenerative disorder classified as a polyglutamine disease.
