

Product datasheet for TA365180S

ZBTB20 Rabbit Polyclonal Antibody

Product data:

Product Type: Primary Antibodies

Applications: IHC

Recommended Dilution: IHC: 100-300

Positive control: Human thyroid cancer

Predicted cell location: Nucleus

Reactivity: Human, Mouse

Host: Rabbit Isotype: IgG

Clonality: Polyclonal

Immunogen: Fusion protein of human ZBTB20

Formulation: pH7.4 PBS, 0.05% NaN3, 40% Glycerol

Purification: Antigen affinity purification

Conjugation: Unconjugated Storage: Store at -20°C.

Stability: 1 year

Gene Name: zinc finger and BTB domain containing 20

Database Link: Entrez Gene 26137 Human

Q9HC78

Background: This gene, which was initially designated as dendritic cell-derived BTB/POZ zinc finger (DPZF),

belongs to a family of transcription factors with an N-terminal BTB/POZ domain and a C-terminal DNA-bindng zinc finger domain. The BTB/POZ domain is a hydrophobic region of approximately 120 aa which mediates association with other BTB/POZ domain-containing proteins. This gene acts as a transcriptional repressor and plays a role in many processes including neurogenesis, glucose homeostasis, and postnatal growth. Mutations in this gene have been associated with Primrose syndrome as well as the 3q13.31 microdeletion

syndrome. Alternative splicing results in multiple transcript variants encoding distinct

isoforms.

Synonyms: DKFZp566F123; DPZF; FLJ26458; HOF; ODA-8S; ZNF288
