Applications:IPCRecommended DilutoriHC 25-100 Positive control: Human liver cancer Predicted cell location: Cytoplasm or NucleusReactivity:HUmanHomanRabbitIstorpe:BabbitIstorpe:IgGClonality:PolyclonalImmunogen:HURengt fusion proteinFormulation:HORengt fusion proteinPordification:UnconjugatedPordification:UnconjugatedStorage:Iorea t-20°C.Stability:Iorea t-20°C.Fachame:Sinter setSSS Human OHBHTOpHRTSignal gadapter molecule involved in p7SNTR/NGFR signaling. Plays arole in response to erve growth factor (NGF). May act as a link between the cell cycle and neuronal differentiation. Inhibits neuronal differentiation in response to erve growth factor (NGF). May act as a link between the cell cycle and neuronal differentiation in the sponse to erve growth factor (NGF). May act as a link between the cell cycle and neuronal differentiation in the sponse to erve growth factor (NGF). May act as a link between the cell cycle and neuronal differentiation in the sponse to erve growth factor (NGF). May act as a link between the cell cycle and neuronal differentiation in the sponse to erve growth factor (NGF). May act as a link between the cell cycle and neuronal differentiation in the sponse to erve growth factor (NGF). May act as a link between the cell cycle and neuronal spinals with internal cell act acts as a link between the cell cycle and neuronal spinals with internal cell act acts as a link between the cell cycle act acts and the spinal cell act	Product Type:	Primary Antibodies
Positive control: Human liver cancer Predicted cell location: Cytoplasm or NucleusReactivity:HumanHomanRabitHost:RabitIsotype:IgClonality:OlyclonalMumanogen:Full length fusion proteinFormulation:PH7.4 PBS, 0.05% NaN3, 40% GlycerolPurification:OliconjugatedFornge:Store at -20°C.Storage:Store at -20°C.Gene Name:Interz Gene S5859 Human OJBHTBackground:Singaling adapter molecule involved in p75NTR/NGFR signaling.Plays arole in cell cycle and neurotrophic factor signaling, possibly by functioning as an upstream modulator of receptor signaling, sosibly by similarity.	Applications:	IHC
Host:RabbitHost:RabbitIsotype:IgGClonality:PolyclonalImmunogen:Full length fusion proteinFormulation:pH7.4 PBS, 0.05% NaN3, 40% GlycerolPurification:Antigen affinity purificationConjugation:UnconjugatedStorage:Store at -20°C.Stability:1 yearGene Name:brain expressed X-linked 1Database Link:Entrez Gene 55859 Human OHBHZBackground:Signaling adapter molecule involved in p75NTR/NGFR signaling. Plays a role in cell cycle any signaling, possibly by functioning as an upstream modulator of receptor signaling, signaling plays and plays an		Positive control: Human liver cancer
Isotype:IgGClonality:PolyclonalImmunogen:Full length fusion proteinFormulation:pH7.4 PBS, 0.05% NaN3, 40% GlycerolPurification:Antigen affinity purificationConjugation:UnconjugatedStorage:Store at -20°C.Stability:1 yearGene Name:brain expressed X-linked 1Database Link:Signaling adapter molecule involved in p75NTR/NGFR signaling. Plays a role in cell cycle progression and neuronal differentiation. Inhibits neuronal differentiation in response to nerve growth factor (NGF). May act as a link between the cell cycle and neurotrophic factor signaling, possibly by functioning as an upstream modulator of receptor signaling, sordinating biological responses to external signals with internal cellular states (By similarity).	Reactivity:	Human
Clonality:PolyclonalImmunogen:Full length fusion proteinFormulation:pH7.4 PBS, 0.05% NaN3, 40% GlycerolPurification:Antigen affinity purificationConjugation:UnconjugatedStorage:Store at -20°C.Stability:1 yearGene Name:brain expressed X-linked 1Database Link:Entrez Gene 55859 Human Q9HBH7Background:Signaling adapter molecule involved in p75NTR/NGFR signaling. Plays a role in cell cycle progression and neuronal differentiation. Inhibits neuronal differentiation in response to nerve growth factor (NGF). May act as a link between the cell cycle and neurotrophic factor signaling, possibly by functioning as an upstream modulator of receptor signaling, coordinating biological responses to external signals with internal cellular states (By similarity).	Host:	Rabbit
Immunogen:Full length fusion proteinFormulation:pH7.4 PBS, 0.05% NaN3, 40% GlycerolPurification:Antigen affinity purificationConjugation:UnconjugatedStorage:Store at -20°C.Stability:1 yearGene Name:brain expressed X-linked 1Database Link:Entrez Gene 55859 Human Q9HBH7Background:Signaling adapter molecule involved in p75NTR/NGFR signaling. Plays a role in cell cycle progression and neuronal differentiation. Inhibits neuronal differentiation in response to nerve growth factor (NGF). May act as a link between the cell cycle and neurotrophic factor signaling, possibly by functioning as an upstream modulator of receptor signaling, coordinating biological responses to external signals with internal cellular states (By similarity).	lsotype:	lgG
Formulation:pH7.4 PBS, 0.05% NaN3, 40% GlycerolPurification:Antigen affinity purificationConjugation:UnconjugatedStorage:Store at -20°C.Stability:1 yearGene Name:brain expressed X-linked 1Database Link:Entrez Gene 55859 Human Q9HBH7Background:Signaling adapter molecule involved in p75NTR/NGFR signaling. Plays a role in cell cycle progression and neuronal differentiation. Inhibits neuronal differentiation in response to nerve growth factor (NGF). May act as a link between the cell cycle and neurotrophic factor signaling, possibly by functioning as an upstream modulator of receptor signaling, coordinating biological responses to external signals with internal cellular states (By similarity).	Clonality:	Polyclonal
Purification:Antigen affinity purificationConjugation:UnconjugatedStorage:Store at -20°C.Stability:1 yearGene Name:brain expressed X-linked 1Database Link:Entrez Gene 55859 Human Q9HBH7Background:Signaling adapter molecule involved in p75NTR/NGFR signaling. Plays a role in cell cycle progression and neuronal differentiation. Inhibits neuronal differentiation in response to nerve growth factor (NGF). May act as a link between the cell cycle and neurotrophic factor signaling, possibly by functioning as an upstream modulator of receptor signaling, coordinating biological responses to external signals with internal cellular states (By similarity).	Immunogen:	Full length fusion protein
Conjugation:UnconjugatedStorage:Store at -20°C.Stability:1 yearGene Name:brain expressed X-linked 1Database Link:Entrez Gene 55859 Human Q9HBH7Background:Signaling adapter molecule involved in p75NTR/NGFR signaling. Plays a role in cell cycle progression and neuronal differentiation. Inhibits neuronal differentiation in response to nerve growth factor (NGF). May act as a link between the cell cycle and neurotrophic factor signaling, possibly by functioning as an upstream modulator of receptor signaling, coordinating biological responses to external signals with internal cellular states (By similarity).	Formulation:	pH7.4 PBS, 0.05% NaN3, 40% Glycerol
Storage:Store at -20°C.Stability:1 yearGene Name:brain expressed X-linked 1Database Link:Entrez Gene 55859 Human Q9HBH7Background:Signaling adapter molecule involved in p75NTR/NGFR signaling. Plays a role in cell cycle progression and neuronal differentiation. Inhibits neuronal differentiation in response to nerve growth factor (NGF). May act as a link between the cell cycle and neurotrophic factor signaling, possibly by functioning as an upstream modulator of receptor signaling, coordinating biological responses to external signals with internal cellular states (By similarity).	Purification:	Antigen affinity purification
Stability:1 yearGene Name:brain expressed X-linked 1Database Link:Entrez Gene 55859 Human Q9HBH7Background:Signaling adapter molecule involved in p75NTR/NGFR signaling. Plays a role in cell cycle progression and neuronal differentiation. Inhibits neuronal differentiation in response to nerve growth factor (NGF). May act as a link between the cell cycle and neurotrophic factor signaling, possibly by functioning as an upstream modulator of receptor signaling, coordinating biological responses to external signals with internal cellular states (By similarity).	Conjugation:	Unconjugated
Gene Name:brain expressed X-linked 1Database Link:Entrez Gene 55859 Human Q9HBH7Background:Signaling adapter molecule involved in p75NTR/NGFR signaling. Plays a role in cell cycle progression and neuronal differentiation. Inhibits neuronal differentiation in response to nerve growth factor (NGF). May act as a link between the cell cycle and neurotrophic factor signaling, possibly by functioning as an upstream modulator of receptor signaling, coordinating biological responses to external signals with internal cellular states (By similarity).	Storage:	Store at -20°C.
Database Link:Entrez Gene 55859 Human Q9HBH7Background:Signaling adapter molecule involved in p75NTR/NGFR signaling. Plays a role in cell cycle progression and neuronal differentiation. Inhibits neuronal differentiation in response to nerve growth factor (NGF). May act as a link between the cell cycle and neurotrophic factor signaling, possibly by functioning as an upstream modulator of receptor signaling, coordinating biological responses to external signals with internal cellular states (By similarity).	Stability:	1 year
Q9HBH7Background:Signaling adapter molecule involved in p75NTR/NGFR signaling. Plays a role in cell cycle progression and neuronal differentiation. Inhibits neuronal differentiation in response to nerve growth factor (NGF). May act as a link between the cell cycle and neurotrophic factor signaling, possibly by functioning as an upstream modulator of receptor signaling, coordinating biological responses to external signals with internal cellular states (By similarity).	Gene Name:	brain expressed X-linked 1
progression and neuronal differentiation. Inhibits neuronal differentiation in response to nerve growth factor (NGF). May act as a link between the cell cycle and neurotrophic factor signaling, possibly by functioning as an upstream modulator of receptor signaling, coordinating biological responses to external signals with internal cellular states (By similarity).		
Synonyms: BEX2; HBEX2; HGR74-h	C	progression and neuronal differentiation. Inhibits neuronal differentiation in response to nerve growth factor (NGF). May act as a link between the cell cycle and neurotrophic factor signaling, possibly by functioning as an upstream modulator of receptor signaling, coordinating biological responses to external signals with internal cellular states (By
	Synonyms:	BEX2; HBEX2; HGR74-h
