

## **Product datasheet for TA365609S**

## **CDA Rabbit Polyclonal Antibody**

## **Product data:**

**Product Type:** Primary Antibodies

**Applications:** IHC, WB

Recommended Dilution: WB: 500-2000

WB positive control: LO2 cell lysate

IHC: 50-200

Positive control: Human breast cancer Predicted cell location: Cytoplasm

Reactivity: Human, Mouse

Host: Rabbit Isotype: IgG

**Clonality:** Polyclonal

**Immunogen:** Fusion protein of human CDA

Formulation: pH7.4 PBS, 0.05% NaN3, 40% Glycerol

**Purification:** Antigen affinity purification

Conjugation: Unconjugated Storage: Store at -20°C.

Stability: 1 year
Predicted Protein Size: 16 kDa

**Gene Name:** cytidine deaminase

Database Link: Entrez Gene 978 Human

P32320

**Background:** This gene encodes an enzyme involved in pyrimidine salvaging. The encoded protein forms a

homotetramer that catalyzes the irreversible hydrolytic deamination of cytidine and deoxycytidine to uridine and deoxyuridine, respectively. It is one of several deaminases responsible for maintaining the cellular pyrimidine pool. Mutations in this gene are associated with decreased sensitivity to the cytosine nucleoside analogue cytosine

arabinoside used in the treatment of certain childhood leukemias.

Synonyms: CDD

## **Product images:**

Gel: 12%SDS-PAGE Lysate: 40 µg Lane: LO2 cell lysate Primary antibody: ITA

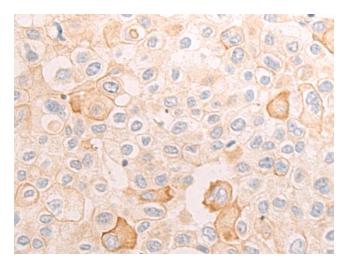

Primary antibody: [TA365609] (CDA Antibody) at

dilution 1/500

Secondary antibody: Goat anti rabbit IgG at

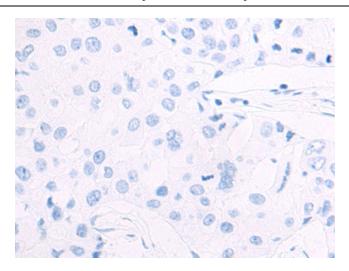

1/5000 dilution

Exposure time: 10 seconds

Immunohistochemistry of paraffin-embedded Human breast cancer tissue using [TA365609] (CDA Antibody) at dilution 1/55 (Original magnification: ×200)

Immunohistochemistry of paraffin-embedded Human breast cancer tissue using [TA365609] (CDA Antibody) at dilution 1/55, treated with fusion protein. (Original magnification: ×200)
