

# Product datasheet for TA365780S

# Syntaxin 5A (STX5) Rabbit Polyclonal Antibody

## **Product data:**

#### **Product Type: Primary Antibodies Applications:** IHC, WB Recommended Dilution: WB: 500-2000 WB positive control: HepG2, A431 and Raji cell lysates IHC: 50-200 Positive control: Human liver cancer Predicted cell location: Cytoplasm **Reactivity:** Human, Mouse, Rat Host: Rabbit Isotype: lgG **Clonality:** Polyclonal Immunogen: Fusion protein of human STX5 Formulation: pH7.4 PBS, 0.05% NaN3, 40% Glycerol **Purification:** Antigen affinity purification **Conjugation:** Unconjugated Store at -20°C. Storage: Stability: 1 year **Predicted Protein Size:** 40 kDa Gene Name: syntaxin 5 Database Link: Entrez Gene 6811 Human Q13190

### **GRIGENE** Syntaxin 5A (STX5) Rabbit Polyclonal Antibody – TA365780S

Background:The membrane protein syntaxin 5 (STX5) is a key component of soluble N-ethylmaleimide-<br/>sensitive factor attachment protein (SNAP) receptor (SNARE) complexes that regulate cellular<br/>protein transport, vesicle docking, and membrane fusion. Syntaxin 5 protein is found as a 42<br/>kDa ("long") protein localized to the Golgi complex and endoplasmic reticulum, and a "short"<br/>35 kDa isoform localized primarily to the Golgi. Formation of the syntaxin 5 SNARE complex,<br/>which also includes proteins Sec22B, Bet1, GOSR1, GOSR2, and Ykt6, allows for regulation of<br/>ER-to-Golgi transport, intra-Golgi transport, and endosome-to-Golgi retrograde transport.<br/>Research studies indicate that the syntaxin 5 SNARE complex also plays an essential role in<br/>autophagy following autophagosome formation. Intracellular protein transport mediated by<br/>the syntaxin 5 complex is required for transport and localized activity of lysosomal proteases.<br/>The experimental reduction or deletion of autophagosomes.

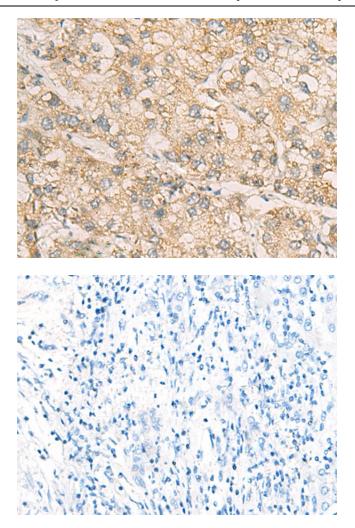

Synonyms: SED5; STX5A
