

Product datasheet for TA366020S

GCAT Rabbit Polyclonal Antibody

Product data:

Product Type: Primary Antibodies

Applications: IHC

Recommended Dilution: IHC: 40-200

Positive control: Human tonsil Predicted cell location: Cytoplasm

Reactivity: Human, Mouse

Host: Rabbit Isotype: IgG

Clonality: Polyclonal

Immunogen: Fusion protein of human GCAT

Formulation: pH7.4 PBS, 0.05% NaN3, 40% Glycerol

Purification: Antigen affinity purification

Conjugation: Unconjugated Storage: Store at -20°C.

Stability: 1 year

Gene Name: glycine C-acetyltransferase

Database Link: Entrez Gene 23464 Human

<u>O75600</u>

Background: The degradation of L-threonine to glycine consists of a two-step biochemical pathway

involving the enzymes L-threonine dehydrogenase and 2-amino-3-ketobutyrate coenzyme A

ligase. L-Threonine is first converted into 2-amino-3-ketobutyrate by L-threonine

dehydrogenase. This gene encodes the second enzyme in this pathway, which then catalyzes the reaction between 2-amino-3-ketobutyrate and coenzyme A to form glycine and acetyl-

CoA. The encoded enzyme is considered a class II pyridoxal-phosphate-dependent

aminotransferase. Alternate splicing results in multiple transcript variants. A pseudogene of

this gene is found on chromosome 14.

Synonyms: KBL; MGC23053
