

Product datasheet for TA366106S

HSPC210 (GSKIP) Rabbit Polyclonal Antibody

Product data:

Product Type: Primary Antibodies IHC **Applications:** Recommended Dilution: IHC: 30-150 Positive control: Human cervical cancer Predicted cell location: Cytoplasm **Reactivity:** Human, Mouse, Rat Host: Rabbit Isotype: lgG **Clonality:** Polyclonal Immunogen: Fusion protein of human GSKIP Formulation: pH7.4 PBS, 0.05% NaN3, 40% Glycerol **Purification:** Antigen affinity purification **Conjugation:** Unconjugated Store at -20°C. Storage: Stability: 1 year Gene Name: GSK3B interacting protein Database Link: Entrez Gene 51527 Human Q9P0R6 Background: This gene encodes a protein that is involved as a negative regulator of GSK3-beta in the Wnt signaling pathway. The encoded protein may play a role in the retinoic acid signaling pathway by regulating the functional interactions between GSK3-beta, beta-catenin and cyclin D1, and it regulates the beta-catenin/N-cadherin pool. The encoded protein contains a GSK3-beta interacting domain (GID) in its C-terminus, which is similar to the GID of Axin. The protein

also contains an evolutionarily conserved RII-binding domain, which facilitates binding with

protein kinase-A and GSK3-beta, enabling its role as an A-kinase anchoring protein.

Alternatively spliced transcript variants have been observed for this gene.

Synonyms:

C14orf129; HSPC210
