

## Product datasheet for TA366117S

## ZMAT4 Rabbit Polyclonal Antibody

## **Product data:**

**Product Type: Primary Antibodies** IHC **Applications:** Recommended Dilution: IHC: 50-200 Positive control: Human gastric cancer Predicted cell location: Nucleus **Reactivity:** Human Host: Rabbit Isotype: lgG **Clonality:** Polyclonal Immunogen: Fusion protein of human ZMAT4 Formulation: pH7.4 PBS, 0.05% NaN3, 40% Glycerol **Purification:** Antigen affinity purification **Conjugation:** Unconjugated Store at -20°C. Storage: Stability: 1 year Gene Name: zinc finger matrin-type 4 Entrez Gene 79698 Human Database Link: <u>Q9H898</u> Background: Zinc-finger proteins contain DNA-binding domains and have a wide variety of functions, most of which encompass some form of transcriptional activation or repression. Zinc finger matrintype protein 4 (ZMAT4) is a 229 amino acid protein that contains four matrin-type zinc fingers. The matrin-type zinc finger, which is very similar in structure to the classical DNAbinding C2H2 zinc finger, was first identified in the protein matrin-3. It has also been identified in several spliceosome RNA-binding proteins, suggesting a role in pre-mRNA binding. ZMAT4 is localized to the nucleus, and two isoforms of this protein exist as a result of alternative splicing events.
