

Product datasheet for **TA366485**

SGTA Rabbit Polyclonal Antibody

Product data:

Product Type:	Primary Antibodies
Applications:	WB
Recommended Dilution:	WB: 500-2000 WB positive control: A172 and LNCAP cell lysates
Reactivity:	Human, Mouse, Rat
Host:	Rabbit
Isotype:	IgG
Clonality:	Polyclonal
Immunogen:	Fusion protein of human SGTA
Formulation:	pH7.4 PBS, 0.05% NaN ₃ , 40% Glycerol
Concentration:	lot specific
Purification:	Antigen affinity purification
Conjugation:	Unconjugated
Storage:	Store at -20°C.
Stability:	1 year
Predicted Protein Size:	34 kDa
Gene Name:	small glutamine rich tetratricopeptide repeat containing alpha
Database Link:	Entrez Gene 6449 Human O43765
Background:	This gene encodes a protein which is capable of interacting with the major nonstructural protein of parvovirus H-1 and 70-kDa heat shock cognate protein; however, its function is not known. Since this transcript is expressed ubiquitously in various tissues, this protein may serve a housekeeping function.
Synonyms:	Alpha-SGT; alphaSGT; hSGT; SGT; SGT1; UBP

Product images:

Gel: 12%SDS-PAGE

Lysate: 40 μ g

Lane 1-2: A172 and LNCAP cell lysates

Primary antibody: TA366485 (SGTA Antibody) at dilution 1/750

Secondary antibody: Goat anti rabbit IgG at 1/5000 dilution

Exposure time: 2 minutes
