

Product datasheet for TA366645

LXR beta (NR1H2) Rabbit Polyclonal Antibody

Product data:

Product Type: Primary Antibodies

Applications: IHC

Recommended Dilution: IHC: 150-300

Positive control: Human thyroid cancer

Predicted cell location: Nucleus

Reactivity: Human, Mouse, Rat

Host: Rabbit Isotype: IgG

Clonality: Polyclonal

Immunogen: Fusion protein of human NR1H2

Formulation: pH7.4 PBS, 0.05% NaN3, 40% Glycerol

Concentration: lot specific

Purification: Antigen affinity purification

Conjugation: Unconjugated Storage: Store at -20°C.

Stability: 1 year

Gene Name: nuclear receptor subfamily 1 group H member 2

Database Link: Entrez Gene 7376 Human

P55055

Background: The liver X receptors, LXRA (NR1H3; MIM 602423) and LXRB, form a subfamily of the nuclear

receptor superfamily and are key regulators of macrophage function, controlling

transcriptional programs involved in lipid homeostasis and inflammation. The inducible LXRA is highly expressed in liver, adrenal gland, intestine, adipose tissue, macrophages, lung, and kidney, whereas LXRB is ubiquitously expressed. Ligand-activated LXRs form obligate

heterodimers with retinoid X receptors (RXRs; see MIM 180245) and regulate expression of target genes containing LXR response elements (summary by Korf et al., 2009 [PubMed

19436111]).

Synonyms: LXR-b; LXRB; NER; NER-I; RIP15; UNR
