

Product datasheet for TA367312

TIF1 alpha (TRIM24) Rabbit Polyclonal Antibody

Product data:

Product Type: Primary Antibodies

Applications: WB

Recommended Dilution: WB: 200-1000

WB positive control: 293T cell

Reactivity: Human, Mouse

Host: Rabbit Isotype: IgG

Clonality: Polyclonal

Formulation: Synthetic peptide of human TRIM24 pH7.4 PBS, 0.05% NaN3, 40% Glycerol

Concentration: lot specific

Purification: Antigen affinity purification

Conjugation: Unconjugated Storage: Store at -20°C.

Stability: 1 year

Predicted Protein Size: 117/113 kDa

Gene Name: tripartite motif containing 24

Database Link: Entrez Gene 8805 Human

<u>015164</u>

Background: The protein encoded by this gene mediates transcriptional control by interaction with the

activation function 2 (AF2) region of several nuclear receptors, including the estrogen, retinoic acid, and vitamin D3 receptors. The protein localizes to nuclear bodies and is thought to associate with chromatin and heterochromatin-associated factors. The protein is a member of the tripartite motif (TRIM) family. The TRIM motif includes three zinc-binding domains - a

RING, a B-box type 1 and a B-box type 2 - and a coiled-coil region.

Synonyms: hTIF1; PTC6; RNF82; TF1A; TIF1-alpha; TIF1A; TIF1ALPHA
